

RED BULL STORAGE TANKS - THAILAND

In October 2008, the company 'Red Bull' decided to repair and protect the inside of their storage tanks using ZINGA. These tanks store the wheat for the production of whisky. In total, the inside of 6 storage tanks (each having an inside surface of 700m²) were Zinganised.

Before

Surface prepared and stripe coated with ZINGA

After ZINGA application

System:

Surface preparation:

Full blast to SA 2,5 and Rz 50-70µm
ZINGA 1 x 60µm DFT
